

HOW SHE GROWS.

The Progressive Strides Sedalia Makes Each Week.

Last Week's Record, One of Which the Citizens Should be Proud—A New Brick Plant Employing Nearly a Hundred Men Coming—Other Industries.

How Sedalia does grow. What a prosperous city she is becoming. Not an empty house in the town. No business property to let and everybody doing a good business and making money. Real estate is more eagerly sought after at better prices than ever before. Outside capital is coming in and thousands of dollars will be invested here before the close of the year.

The most glorious news of all, however, is that manufactories are coming. This last week has practically decided that Sedalia will have 300 additional inhabitants within 60 days by the establishment of a vitrified brick plant. The electric line will be extended to the west side and Association park, which means the investment of capital and the employment of labor. The great ice plant has begun to turn out chunks of coldness, and give employment to men. Streets are to be paved, buildings erected, sewers constructed and works of every kind pushed.

During the past week another manufacturing industry has been partially developed with every prospect of early success. Mr. James Ramsey, one of the largest brick manufacturers in the state of Kansas and one of the heaviest contractors in Topeka has been in the city looking on at the growth and making an examination of the clays in this section. The visit has been of an exceedingly satisfactory nature thus far and is very likely to result in the establishment here of a vitrified brick plant which will employ between seventy-five and one hundred men. This of course means an addition of at least 300 inhabitants.

In addition to this, Mr. Ramsey sees here a field for a vast amount of street paving. He expects to get the lion's share of it as he will have his material on the ground and can do it cheaper than a contractor can who has to get his material from elsewhere.

The paving of Broadway cost in the neighborhood of \$40,000 practically all of which was carried out of the city. If the brick had been made here and the contractors had been residents of Sedalia, the work would not have cost them more than about \$27,000, and all of the money would have been spent in Sedalia. Thus there would have been a net saving to the property holders of about \$13,000.

The above is a practical instance of the value of manufactories to a city and should spur the citizens up to renewed efforts to secure many more.

Not only does Sedalia need a manufactory for paving brick, but one for building brick. There are thousands of brick used here each year and the prospects are that more will be used in the next twelve months than ever before. They have to be shipped in at heavy freight rates and contractors and builders subject to vexatious delays.

Judge Metsker yesterday morning commenced an inspection of the track of the Third street horse car line with a view of changing it into an electric line at once. The road bed with a good surfacing up will answer very well and the rails are just as good as new. They will be changed with the flange outside and will in consequence make a better surface for teams than do the T rails. It is contemplated to extend the west end of the line, about a quarter of a mile west of the present terminus. It is very probable also that the line will be run to Dundee Place, the arrangements being about completed for that extension. This work will employ a large force of men and will be the result of the investment of a large amount of capital adding to the wealth of the city.

In this connection the opinions of the people of the outside world are of interest.

Mr. William West, of Kansas City, a gentleman who has constructed over 600 houses in that city has been here during the week and expresses himself as having never seen a more prosperous little city. He has almost decided to come here and build a number of houses.

Mr. Scott, who has made a cool million in Kansas City realty and who is recognized as a shrewd, cau-

ous investor, is strongly of the belief that there is a field here to make several thousand dollars by investing in real estate, improving and holding it.

Col. A. P. Jetmore, of Topeka, master in chancery of the M., K. & T. railway, says that he is constantly traveling over the country and in all his travels he has not seen a more prosperous city than Sedalia.

THE LADIES DELIGHTED.

WILD ATHLETES.

The performance of the barbarous and fanatic bedouin and Berber Boors with Sells Brothers' colossal anti-monopoly World's fair of wonders are surpassingly novel and exciting, and you will all say so on Thursday, May 28.

MISTOOK HIM FOR A BOY.

For several weeks J. T. Price, the union depot news agent, has been handling the St. Louis Chronicle.

Yesterday morning he received a letter from the proprietors of the paper, complimenting him upon his good work, and requesting that he send them his photograph so that his picture might appear in the Chronicle's gallery of "bright boys," who act as their agents.

Mr. Price happens to be a married man and can hardly be classed with the kids.

AN EARLY MORNING FIRE.

At 12:40 o'clock yesterday morning the fire department was called to the rear of the Catholic church to put out a fire in a small frame shanty, owned by M. H. Woodfin and occupied by Dave Gaston. The loss was about \$200 and no insurance. The cause of the fire is unknown.

THE PACKAGE FOUND.

The registered package reported short to the Sedalia Postoffice to John H. Kehn, transfer mail clerk, was found Friday night in the Chetopa, Kan., mail pouch. John is happy.

AFTERNOON AND EVENING STARS.

The greatest principal performers of every land and school are with Sells Brothers' supremely great anti-monopoly show, and will be forthcoming at Sedalia on Thursday May 28.

WILL BE PAVED.

There is now no longer any doubt but that Fifth street will be paved, yesterday being the last day on which a remonstrance could be filed and none had been filed up to time of closing the city offices. The street will be paved to the full width with vitrified brick from Ohio street to Hancock street. The council will authorize the city engineer to advertise for bids and it will probably be sixty days before active work can commence.

The Lilliputians played to large houses at the Olympic, St. Louis last week.

Beethoven's Fidelio will be given to-night at exposition music hall St. Louis.

AT DEATH'S THRESHOLD.

Mrs. C. E. Emmert, whose dangerous illness has before been referred to by the BAZOO, was reported to be no better at midnight last night and the chances are largely against her recovery. This will be sad news to the large circle of friends who knew a bright and lovable girl when she was Anna Barrett, and later in her young married life. Her battle with death has been sadly watched and many prayers and hopes have been offered for her recovery.

LATER—Mrs. Emmert breathed her last at 2:50 this morning, aged 22 years and 3 months.

John Barrett, brother of the deceased, was telegraphed to at Columbia, La., yesterday of his sister's serious illness and no doubt is on his road home.

A WONDER WORKER.

Mr. Frank Huffman, a young man of Burlington, Ohio, states that he had been under the care of two prominent physicians, and used their treatment until he was not able to get around. They pronounced his case to be Consumption and incurable. He was persuaded to try Dr. King's New Discovery for Consumption, Coughs and Colds and at that time was not able to walk across the street without resting. The following statement from Mr. W. B. Denny, a well known dairyman of New Lexington, Ohio, will be of interest to persons troubled with Rheumatism. He says "I have used Chamberlain's Pain Balm for nearly two years, four bottles in all, and there is nothing I have ever used that gave me as much relief for rheumatism. We always keep a bottle of it in the house." For sale by Aug. T. Fleischmann, Druggist.

THE WARRENSBURG SCHOOL.

Judge Dalby returned yesterday morning from Warrensburg, where he has been attending a meeting of the executive committee of the Warrensburg Normal school. The committee audited the bills and made some arrangements for the holding of the commencement exercises.

There is an old adage that "What everybody says must be true." Henry Cook, the leading merchant of New Knoxville, Ohio, says: "Chamberlain's Cough Remedy has taken well here, everybody likes it. They say it gives immediate relief." That is what makes it so popular. It is prompt in relieving a cough or cold and can always be depended upon. There is nothing that will loosen and relieve a severe cold so quickly. For sale by Aug. T. Fleischmann, Druggist.

MODEL MOTIVE POWER.

The Baltimore and Ohio Rail Road Company has recently placed in service on its fast trains between New York, Philadelphia, Baltimore and Washington, three new engines which are doubtless the finest and fastest ever built in this country. These new flyers have driving wheels six feet, six inches high and cylinders 20 inches by 24. The large cylinders give them tremendous power and the high drivers protect the machinery from the rack and strain incident to driving smaller engines at great speed. There is practically no limit to the speed to which these new marvels may be driven and they skim over the rails as smoothly as a swallow over a lake.

Another recent addition to the motive power of the company is a consignment of eight powerful ten wheel passenger engines, designed for service on the mountain divisions. These are the heaviest ten wheel engines ever constructed, weighing sixty seven and one-half tons. They have driving wheels six feet two inches high and cylinders 21 inches by 26. One of these machines performs the work heretofore requiring two of the ordinary class and they take the heavy through express trains up the mountain grades quickly and with perfect ease.

The Mt. Clare shops of the company have recently completed an order for ten switch engines of the highest type, and sufficiently powerful to make up a train equal to the full drawing power of a consolidation freight engine. Also three new heavy eight wheel passenger engines, having driving wheels five feet eight inches, and cylinders twenty inches, by twenty four. These engines are doing excellent work; they are very powerful and susceptible of great speed.

In addition to the foregoing the Company has now under construction at its Mt. Clare Shops ten powerful ten wheel engines designed for fast freight service and for heavy passenger trains on occasion, also twelve consolidation freight engines of great power.

These additions to its motive power are in line with the other great improvements constantly being made in the general betterment of the B. & O. property by its present management, which have been noted by the press from time to time, and the rapid augmentation of the passenger traffic of the Company indicates that the public is quick to recognize the present and constantly increasing efficiency of its service.

—The suit brought several years ago by the Washab and Western railroad company to enjoin John M. Kinner and Samuel T. Fisk, the brokers, from disposing of twenty-one of its tickets below the regular price, was dismissed in the common pleas court at Cleveland. The tickets were finally taken up by the road and the case was settled.

—Frank Garrity and B. Thomas were released from the Hospital yesterday.
